- How to Boost your Practice Image
- Team Motivation; Techniques to Pump Up Your Staff

Objectives

Upon completion of this course, the dentist will be able to:

Minimally prepare teeth for porcelain veneers

Fabricate beautiful provisionals

Communicate all critical information to the lab

Cement multiple restorations simultaneously with confidence

Testimonials

"This course was instrumental early on in my career in how I viewed cases. This program encourages forward thinking and will give you the ability to envision and achieve success while continually exceeding patients' expectations. You will definitely come away with the knowledge on how to blend functionality with the art of esthetic dentistry."

-Dr. Shawn Loo

"My favorite program I've ever attended. My staff and I learned solid techniques that lead to predictable results. Your esthetic capabilities and visions will be expanded. Having availability to a quality lab and mentors will lead to a palpable decrease in stress in your life!"

-Dr. Barrett Bartell

Program Instructors

Thomas E. Dudney, DMD is a 1977 graduate of the University of Alabama at Birmingham School of Dentistry. He has served in the past as the Clinical Director for the Aesthetic Advantage hands-on programs taught by Dr. Larry Rosenthal at New York University and the Eastman Dental Clinic in London. Presently he is the clinical director of the Pacific Aesthetic Continuum (PAC) hands-on programs. In addition to teaching hands-on programs, Tom has presented workshops and lectures at numerous dental meetings and has authored several articles on aesthetic and restorative dentistry. He is a member of the American Dental Association, the Alabama Dental Association, and the American Academy of Cosmetic Dentistry. Tom is also a fellow of the American Society for Dental Aesthetics and a Diplomate of the American Board of Aesthetic Dentistry, as well as a member of Catapult Speakers Bureau.

Augusto Robles, DDS, MS, DMD graduated from "Cayetano Heredia" University in Peru in 1992. After having taken several mini residencies in Esthetics, Occlusion, and All-ceramics in Peru, Dr. Robles trained at The University of Michigan, receiving the Advanced Specialty Education in Restorative Dentistry Certificate and a Master of Science degree, also in Restorative Dentistry. Currently, Dr. Robles is an Associate Professor in the Department of Restorative Dental Sciences and the Director of Operative Dentistry. Dr. Robles focuses on restorative procedures, adhesive dentistry, and digital impressions.

Nathaniel Lawson, DMD, Ph.D. received his DMD from UAB School of Dentistry and his PhD from the Department of Biomedical Engineering at UAB. He is the Director of the Division of Biomaterials at the UAB School of Dentistry and the Program Director for the Biomaterials Residency Program. His research interests include the clinical and laboratory evaluation of dental ceramics and composites.

Program Schedule (7:30am breakfast/check-in)

Weekend 1 – Preparation

Day 1 – Lecture – 8am to 5pm

In-depth, interactive presentation and lecture covering:

- A thorough understanding of smile design principles and the role they play in anterior aesthetics
- Ideal preparation design for porcelain veneers
- How to fabricate beautiful provisional restorations and use them for patient and laboratory communication
- Post-op evaluation of provisionals : aesthetically, functionally, and phonetically to insure a successful result
- How to properly communicate all necessary information to the laboratory including photography, stick bite, facebow, impressions, occlusal records, and the written Rx
- Group case review with presentation and treatment planning of all cases

Day 2 – Clinic – 8am to 5pm

- Preparation of an anterior aesthetic case (with instructor - live patient hands-on)
- Utilizing laser and other technologies: laser contouring
- Digital impressions
- Temporization made easy and consistent utilizing a functional diagnostic wax-up
- Material selection
- In-clinic laboratory assistance
- Intraoral photography and digital cameras

Weekend II – Cementation

Days 3 – Lecture – 8am to 5pm

- Indirect restorative materials, adhesives, and cements
- Step by step adhesive cementation of anterior aesthetic restorations
- How to adhesively bond zirconia
- Conventional cementation of zirconia
- Understanding the role of occlusion for long term success

Days 4 – Clinic – 8am to 5pm

- Step by step cementation of an anterior aesthetic case (live patient hands-on) with a simple technique for predictable results every time
- Experience a variety of cases during cementation in a friendly, supportive learning environment
- Occlusal adjustments and final polish
- Graduation and diploma presentation
